## Péter Hegyi receives Richter Medal

On April 26, 2024, members of the Hungarian specialist society who have achieved outstanding professional results were again awarded the Richter Medal of Merit. By awarding the prizes, Richter Gedeon Plc. aims to reward the

outstanding work of the various players in the healthcare sector in a worthy manner, to provide inspiration by presenting the outstanding entries of the award winners, and to support the widespread dissemination or further development of innovative ideas and good practices that can contribute to the further modernisation of healthcare and the efficiency of the medical profession in the long term. We are very proud that this year Péter Hegyi was among the winners as the most outstanding physician of the year for scientific or innovative work.

## **András Garami wins Talentum Prize**

The Talentum Prize was established in 2013 by the National Foundation for Biomedical Sciences and rewards internationally significant discoveries published in the last year or two. It is also awarded to scientists who, like Albert Szent-Györgyi, have carried out a significant part of the research related to their discovery in Hungary. The researchers to be recognised are selected by the professional board of the National Academy of Sciences and the Foundation's Board of Trustees.

On 15 April, Dr. András Garami, Associate Professor at the Institute of Translational Medicine of the University of Pécs, received the award at a gala event at the Szeged National Theatre for his research on the relationship between regular consumption of hot peppers and blood cholesterol levels.
