

List of topics 2022/2023

Implant placement accuracy
Implant complications and HbA1c levels
Dental prevention programs among children
Postoperative complications in dental surgery
Defects of dental enamel
Maternal risk factors for orofacial clefts
Patient Specific Implants
E-cigarettes and oral cancer
Bioactive materials in vital pulp therapy
Different implant placements and loading protocols
IUDs in emergency contraception
Platelet-rich plasma (PRP) fertility treatment for women
Non-Invasive Prenatal Testing
Malnutrition in gastrointestinal cancer
ERCP options after Roux-en-Y gastric bypass
Pancreatic oncology
Therapies in Clostridium difficile infection
Acid Suppressive Treatment for Non-Specific Chronic Cough
Infected necrosis in acute pancreatitis
Biological therapy for IBD
Chronic liver disease and acute pancreatitis
Risk factors for pancreatic cancer
Sarcopenia in Crohn's disease
Vit. D for Chronic liver disease
Hepaticogastrostomy in Malignant Biliary Obstruction
Splanchnic vein thrombosis in acute pancreatitis

Anastomoses in Total Mesorectal Excision
Treatments for endometriosis related pain
MMP-7 in urothelial carcinomas
Thermoablation of early-stage adrenal gland tumors
Bacterial infections and adverse birth outcomes
Oral and parenteral contraceptives
Anemia and pregnancy outcomes
Endometrial cancer MiRNA
Risk factors for complications in female pelvic organ prolapse surgery
GLP-1 agonists in PCOS
Polycystic ovary syndrome
Long-term oral contraceptive and cancer risk
Treatment of oral mucositis
Combination therapies for melanoma malignum
Adaptogens
Serum lipids and COVID-19
Phytomedicines
Early severity prediction models of Covid-19
TNF-inhibitors and cardiovascular risk
Fabry disease in kidney transplanted patients
Surgical management of thoracolumbar burst fracture.
Different hemipelvectomy techniques
Predictors of suicide in borderline personality disorder
Dysbiosis in the critically ill
EG connectivity measures in disorders of consciousness
Optimization of cardiac resynchronization therapy
MR fusion US-guided biopsy of soft tissue tumors

Cholesteatoma staging
Vit. D and Athletes
Procalcitonin-guided antibiotic therapy
Urinary biomarkers for predicting acute kidney injury after cardiac surgery
Transcranial magnetic stimulation in schizophrenia
Calcified coronary lesions
Predicting sudden cardiac death
Discharge after acute onset chest pain
CAR T-cell therapy
IBD and extraintestinal manifestations
Respiratory interventions for patients with cerebral palsy
Neonatal resuscitation
Ventriculoperitoneal shunt infections
Antibiotic therapy in critically ill pediatric patients
Affective disorders in children with brain tumors
Prediction models in childhood cancer
Radiotherapeutic modalities in pediatric brain tumors
Modes of delivery for preterm infants
Intraventricular hemorrhage in preterm neonates
