

Date of the control:

Administrative data

Were there any injuries in the past? Yes, No

If yes, What was it?

I. Physical examination of the injured limb(s)

I.1. Vascular

- O2 Saturation of the injured limb was measured: Yes, No

If yes: (0-100)

- radial pulse was measured on the injured limb: Yes, No

If Yes,

- Palpable,
- Not palpable with definite micro circulation (pulseless pink hand) – PPH
 - US doppler
 - CT angio
 - no investigation
- Not palpable with poor micro circulation (capillary refill time) CRT<3 sec (pulseless white hand) – PWH
 - US doppler
 - CT angio
 - no investigation

I.2. Neural

- Examination of the hand: Yes, No

If yes,

- Can not be objectively evaluated due to pain
- Complete/Total function
- Radial nerve dysfunction
- Ulnar nerve dysfunction
- Median nerve dysfunction

- VAS score Yes/NO/ no data

Investigation

Control investigation: Yes/No/No data

1. X-ray examination AP, lateral

2. CT scan: yes, no

Thearpy:

Removal of the K-wire: Yes/No/No data

The date of the K-wire removal (week):

- 3 weeks
- 4 weeks
- 5 weeks
- 6 weeks
- 7 weeks

How was the K-wire remove: general anesthesia, local anesthesia

Complication: Yes/No/No data

Vascular Yes/No/No data

Neural Yes/No/No data

Osteogen Yes/No/No data

Yes: Rotation disorder Yes/No/No data

Redislocation Yes/No/No data

If Yes: Reoperation: Yes/No/No data
